

Contents

1	Quantum Dynamics	2
1.1	Time Evolution	2
1.2	Time-Dependent Wave Equation	9
1.3	Propagators	12
1.4	Feynman Path Integral Formulation	19
2	Lorentz Transformations	26
2.1	Elementary Considerations	26
2.2	Lorentz Transformations as Orthogonal Transformations in Four Dimensions	28
2.3	Electrodynamics in Four Vectors	32
2.4	Lorentz Transformations in a Four Vector Notation	34
2.5	Elements of Special Relativity	35
3	The Klein-Gordon Equation	40
3.1	Physical Problems of the Klein-Gordon Equation	40
3.2	Nonrelativistic Limit of the Klein-Gordon Equation	44

3.3	Free Spin-0 Particles	45
3.4	The Charged Klein-Gordon Field	47
3.5	The Klein-Gordon Equation in Schrödinger Form	48
3.6	Free Spin-0 Particles in the Feshbach-Villard Representation	53
3.7	Interpretation of One-Particle Operators in Relativistic Quantum Mechanics	57
3.8	Klein-Gordon Equation with Interaction	62
4	The Dirac Equation	64
4.1	Towards the Dirac Equation	64
4.2	Properties of the γ -Matrices	68
4.3	Covariant Bilinear Forms	73
4.4	The Dirac Current	75
4.5	Solutions of the Free Dirac Equation and Interpretation of the Dirac Spinors	80
4.6	Successes of the Dirac Theory: G -Factor of the Electron and Spin Orbit Coupling	89
4.7	Non-Relativistic Limit - Foldy-Wouthuysen Transformation	96
4.8	Physical Problems of the Dirac Theory: Spin Conservation and Zitterbewegung	107
4.9	Complications with Negative Energies, the Klein Paradox	112
4.10	Interpretation of the Negative Energies	119
4.11	Particle Anti-Particle Conjugation	123
5	Dirac Equation with Interactions	126
5.1	Dirac Hamiltonian	126

5.2	Central-Force Problem	128
5.3	Determination of the Radial Equation	131
5.4	Boundary Conditions for the Radial Functions $F(r)$ and $G(r)$	136
5.5	The Hydrogen Atom	137
5.6	The General Force Problem	142
5.7	Free Spherical Solutions	143
6	Introduction to the Quantization of Fields	147
6.1	The Classical Linear Chain	147
6.2	The Quantum Mechanical Linear Chain	154
6.3	Continuum Limit: Classical	155
6.4	Continuum Limit: Quantum Mechanical	160
6.5	Quantization of Schrödinger Field (Bose Statistics)	162
6.6	Quantization of the Schrödinger Field (Fermi Statistics)	169
7	Appendix A: The Mandelstam Variables	177
