Good Code

How to write good code:

1. Start project.
2. Do things right or do them fast?
   - Fast: Code fast.
   - Right: Code well.
3. Does it work yet?
   - No: Almost, but it's become a mass of kludges and spaghetti code.
   - Yes: No, and the requirements have changed.
4. Are you done yet?
   - No: Throw it all out and start over.
   - Yes: Good code.
